

MOD-5 MODEL QUESTIONS FOR PRACTICE

- Q1. Discuss various Non-conventional energy and its resources.
- Q2. Distinguish between : Renewable and Non-renewable Energy Resources.
- Q3. Discuss the advantages and disadvantages of Renewable Resources.
- Q5. What are the different Renewable Energy Forms available in nature.
- Q6. With a suitable diagram explain the working of Solar Energy to electrical energy production system. State the limitations of it.
- Q7. With a suitable diagram explain how the Wind Energy can be utilized for power generation. State the limitations of it.
- Q8. With a suitable diagram explain how the Tidal Energy can be utilized for power generation. State the limitations of it.
- Q9. With a suitable diagram explain how the Ocean Thermal Energy can be utilized for power generation. State the limitations of it.
- Q10. With a suitable diagram explain how the Geothermal Energy can be utilized for power generation. State the limitations of it.
- Q12. With a suitable diagram explain how the Nuclear Energy can be utilized for power generation. State the limitations of it.
- Q13. With a suitable diagram explain how the Hydro Energy can be utilized for power generation. State the limitations of it.
